THERMOSTATIC ACTUATOR WITH MICRO 230V

Thermoelectric valve drive for opening and closing valves and small valves uses in the fields of heating, ventilation and air conditioning engineering.

The integrated micro-switch with floating contact allows direct operation of a pump or fan control unit.

Simple plug-in installation with valve adapters.

CARACTERÍSTICAS:

- ✓ Integrated switch floating contact.
- ✓ Design “normally closed” (NC).
- ✓ Power consumption 1 watt.
- ✓ Micro-switch switching current: 5 A resistive load, 1^a inductive load.
- ✓ Simple plug-in installation.
- ✓ Patented 100% protection in case of leaking valves.
- ✓ Valve adaptation control.
- ✓ All around function display.
- ✓ Surge protection guarantee.
- ✓ Certified by TÜV y NRTL.

Degree of protection: IP 54
Wire section: 4x 0,75mm²
Connection line: 1m
Casing colour: light grey (RAL 7035)

VERSION 230V

Type	Control Direction	Valve path	Close force	Article description
AES 2045-00N	NC	4mm	100N	With “First Open function” neutral
